# Lionbridge

# Lionbridge App for Oracle Eloqua

Version 1.5.3

## Release Notes

July 18, 2017

### **Overview**

Welcome to the Lionbridge App for Oracle Eloqua (App). The App enables you to automate sending and retrieving content from Oracle Eloqua, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

## **How to Contact Clay Tablet Support**

Email @: support@clay-tablet.com

Telephone: +1-416-363-0888

You can submit a support ticket either:

- by email
- from the Clay Tablet Zendesk page, using your web browser

#### To submit a support ticket:

- 1. Do one of the following:
  - Email support@clay-tablet.com, and cc (carbon copy) anyone to include in the ticket correspondence.

**Important:** Include the information and attachments in your email that are listed in the sub-sections below.

- Create a ticket in Zendesk:
  - a. Open the Clay Tablet Zendesk page in your browser: https://claytablet.zendesk.com.
  - b. Sign in to Zendesk. If you do not have sign-in credentials, see "To view and update your support ticket in Zendesk:" below.

Important: Include the information and attachments that are listed in the sub-sections below.

- c. Click Submit a request.
- d. In the **CCs** field, add anyone to include in the ticket correspondence.

Zendesk automatically creates a ticket and responds to everyone included in the cc field.

2. Everyone in the original cc receives updates unless they request to be removed from the ticket.

**Important:** Check your email spam folder (especially first-time Zendesk users) as sometimes email notifications from Zendesk are marked as spam.

When the issue is resolved, Clay Tablet closes the ticket.

#### Information to include in the support ticket:

- client name
- CMS or content system name and version
- Connector or App version installed
- name of job for which the issue occurs
- date of job submission
- detailed description of the issue
- any error text-copy and paste, if applicable

#### Files to attach to the support ticket:

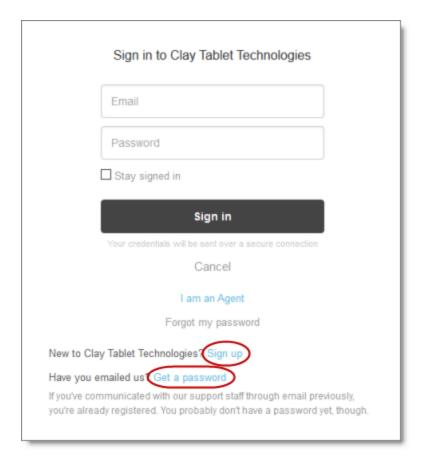

- CMS log files for the date the issue occurred
- Clay Tablet log files for the date the issue occurred
- screen capture of the issue

#### To view and update your support ticket in Zendesk:

**Important:** You must log into Zendesk to view your support tickets there.

- 1. Open the Clay Tablet Zendesk page in your browser: <a href="https://claytablet.zendesk.com">https://claytablet.zendesk.com</a>.
- 2. In the top-right corner, click **Sign in**, and enter your credentials.

**Note:** If you do not have sign-in credentials yet, then click either **Sign up** or **Get a password**, and follow the onscreen instructions.

- 3. After signing in, click My activities to view the tickets you opened or where you are cc'd.
- 4. To update tickets, you can reply or attach files.

For more information, refer to "Submitting and tracking support requests" in Zendesk's *Help Center guide for end-users*, at: <a href="https://support.zendesk.com/hc/en-us/articles/203664386-Help-Center-guide-for-agents-and-end-users">https://support.zendesk.com/hc/en-us/articles/203664386-Help-Center-guide-for-agents-and-end-users</a>.

**Important:** Zendesk refers to a *support ticket* as a *support request*. These terms are interchangeable.

## What's New?

- Target assets now inherit user permissions from the corresponding source assets.
- Previously, the Lionbridge App sent the source asset directly for translation. The App now copies the source asset to the target location to create the target asset. Then App then sends the target asset for translation. This means that both the source ID (SourceID) and the target ID (TargetID) are in the XML file that the App sends out for translation, which facilitates tracking.
- In the new **Notification Format for Translation Completed** section of the **Translation Settings** tab of the **Site Notification** dialog box, you can now configure the email format for the notifications that the Lionbridge App sends out when a translation job is completed.

- In the new **Email Translation** check box in the **Translation Settings** tab of the **Site Notification** dialog box, you can now configure the Lionbridge App to include the **From Name** field when it sends out Email assets for translation.
- Previously, when opening the Lionbridge App from within Eloqua, users were prompted for credentials every time, even within the same Eloqua session. Users are now prompted for credentials only the first time in an Eloqua session that they open the Lionbridge App.
