# Lionbridge Connector for Hybris

Version 2.1.2

# **Release Notes**

March 27, 2018

#### Overview

Welcome to the Lionbridge Connector for Hybris (Connector). The Connector enables you to automate sending and retrieving content from your Hybris CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

### How to Contact Lionbridge Connector Support

Email @: connectors@lionbridge.com

Telephone: +1-416-363-0888

You can submit a support ticket either:

- by email
- from the Lionbridge Connectors Zendesk page, using your web browser

#### To submit a support ticket:

- 1. Do one of the following:
  - Email <u>connectors@lionbridge.com</u>, and cc (carbon copy) anyone to include in the ticket correspondence.

**Important:** Include the information and attachments in your email that are listed in the sub-sections below.

- Create a ticket in Zendesk:
  - a. Open the Lionbridge Connectors Zendesk page in your browser: <u>https://connectors.zendesk.com</u>.
  - b. Sign in to Zendesk. If you do not have sign-in credentials, see "To view and update your support ticket in Zendesk:" below.

**Important:** Include the information and attachments that are listed in the sub-sections below.

- c. Click Submit a request.
- d. In the **CCs** field, add anyone to include in the ticket correspondence.

Zendesk automatically creates a ticket and responds to everyone included in the cc field.

2. Everyone in the original cc receives updates unless they request to be removed from the ticket.

**Important:** Check your email spam folder (especially first-time Zendesk users) as sometimes email notifications from Zendesk are marked as spam.

When the issue is resolved, Lionbridge closes the ticket.

#### Information to include in the support ticket:

- client name
- CMS or content system name and version
- Connector or App version installed
- name of job for which the issue occurs
- date of job submission
- detailed description of the issue
- any error text–copy and paste, if applicable

#### Files to attach to the support ticket:

- CMS log files for the date the issue occurred
- log files for the date the issue occurred
- screen capture of the issue

#### To view and update your support ticket in Zendesk:

Important: You must log into Zendesk to view your support tickets there.

- 1. Open the Lionbridge Connectors Zendesk page in your browser: <u>https://connectors.zendesk.com</u>.
- 2. In the top-right corner, click **Sign in**, and enter your credentials.

**Note:** If you do not have sign-in credentials yet, then click either **Sign up** or **Get a password**, and follow the onscreen instructions.

ou're alrea	idy registered. You probably don't have a password yet, though.

- 3. After signing in, click **My activities** to view the tickets you opened or where you are cc'd.
- 4. To update tickets, you can reply or attach files.

For more information, refer to "Submitting and tracking support requests" in Zendesk's *Help Center guide for end-users*, at: <u>https://support.zendesk.com/hc/en-us/articles/203664386-Help-Center-guide-for-agents-and-end-users</u>.

Important: Zendesk refers to a support ticket as a support request. These terms are interchangeable.

#### **System Requirements**

The Lionbridge Connector for Hybris ("Connector") supports Hybris versions 6.1 and higher. The Connector has several pre-installation requirements, described in "Before You Install" in the *Lionbridge Connector for Hybris Installation and Configuration Guide*.

The Connector requires Java 8.

The Connector has no additional hardware or software requirements beyond those of Hybris. For detailed requirements, refer to the appropriate version of the Hybris documentation at https://wiki.hybris.com.

Memory	16 GB minimum is recommended by Hybris. This is recommended for
	the Connector to function as expected.

Disk Space	5 GB is recommended by Hybris.
	The Connector installation requires an additional 170 MB of disk
	space.
	Space for storing log files.

## Issues Fixed in This Release

Issue ID	Description
LHYB-143	In previous versions of the Connector, the <b>Content Mapping</b> page displayed Hybris objects that had no localized attributes. This issue has been resolved. The <b>Content Mapping</b> page no longer displays Hybris objects that have no localized attributes.
LHYB-319	In previous versions of the Connector, in the Language Mapping section of the System Configuration page, the Delete button was not fully displayed for each pair of mapped language codes. This issue has been resolved. The Delete button is now fully displayed for each pair of mapped language codes.
LHYB-344	In previous versions of the Connector, when sending out content for translation, the Connector did not send out the keyword property, and an error was displayed in the log file. This issue has been resolved. The Connector now sends out the keyword property for translation.

## Known Issue

Issue ID	Description
LHYB-318	In the Translation Settings section of the System Configuration page, if the Maximum number of items per translation file or the Cron Job Interval (Minutes) settings has a value greater than 999999999, an Out of range error message is displayed.
